Preface

This is the thirtieth edition of the Statistical Abstract which presents annual data for 2007 with series for earlier years as appropriate.

The Abstract brings together in one publication a summary of available statistics relating to the climate, land areas, demography, tourism, external trade, the economy and finance, production and communication, prices, employment, health, education and crime. More detailed information is available for most of the series which appear in the Abstract.

The preparation of the Abstract is a lengthy process and more up-to-date information is available in tables published quarterly and monthly Statistical Bulletins on tourism, external trade, employment consumer price index and production, whereas demographic data is up-dated in half yearly bulletins.

A list of statistical publications is included at the end of this edition. These are available from the National Statistics Bureau, Caravelle House, P.O Box 206, Victoria, Mahe, Seychelles.

Many tables appearing in the Abstract have been compiled from information provided by other government agencies and establishments in the private and parastatal sectors. Their assistance is gratefully acknowledged.

The following symbols are used in the tables:

“-“ means nil or less than half the digit shown

“..” means not available

P= Provisional

Rm = Rupees Million

R= Rupee

(‘000)= Thousand

No= Number

Km= Kilometres

Where figures have been rounded to the nearest final digit (e.g., to thousands or tonnes) the rounded total need not necessarily equal the sum of the rounded constituent items.

Notes:(1) The figures have been rebased using the 2002 Population and Housing census results:

(2)The original census figure has been adjusted by 2.4% to take into account undercounts

(3)Variation in single ages and age group are due to adjustments for short and long term migration

Notes:

(1) Total Fertility Rate (TFR). This indicates the total number of children a woman would have throughout her lifetime if she experienced present fertility rates.

(2) Gross Reproduction Rate (GRR). This is similar to TFR except it refers to the number of daughters that would be born during the woman's lifetime.

Notes:

(1) The indices have been compiled using the paasche formula (current weights) applied to 109 items. These items account for over 60% of the total value of imports. A lower percentage coverage is achieved for Sections 6, 7, and 8. For more details on the indices refer to "Methodological manual for the computation of export and import unit value/price index number for Seychelles" published by Statistics Section, July 1980.

(2) Laspeyres (base-weighted) index.

Footnotes to National Accounts tables

- (i) Seychelles Rupees per US dollar, year average
- (ii) Institutional sectors as defined in UN System of National Accounts (SNA93), with Seychelles modifications
- (iii) Includes Other Taxes on Production, Taxes on Production (e.g. GST) and Imports, where not allocated to specific Industries
The majority are Customs Duties and GST on Imported goods
- (iv) Financial Intermediation Services Indirectly Measured (FISIM)
- (v) Seychelles Industry Classification (2007) and International Standard Industrial Classification (ISIC) Revision IV
- (vi) "Indicative" estimates are at an early stage of development and are expected to be substantially improved with further work
They are provided for information purposes, but do not warrant the status of "Official Statistics"
- (vii) Includes "Individual" and "Collective" government final consumption expenditure.
- (viii) Based on early results from the 2006/2007 Household Budget Survey, plus estimated output of "Non-Profit Institutions Serving Households"
- (ix) Calculated as construction output from GDP estimate, plus imports of capital goods
- (x) Government Capital Projects
- (xi) Calculated as the residual
- (xii) Goods and Services (net), from the Balance of Payments
- (xiii) Expressed as GDP Production less GDP Expenditure, because the production measure is considered more reliable
- (xiv) Based on production volume indicators where available, otherwise on employment numbers
- (xv) An implicit measure of price change over the entire economy
Calculated as ratio of Current to Constant Price GDP, with 2006 as the base year
- (xvi) Measure of price change for household consumption only
- (xvii) Tourism direct contributions only, estimated as value added for the main tourism related activities, less estimated domestic consumption shares
